Processing Plant Evaporator

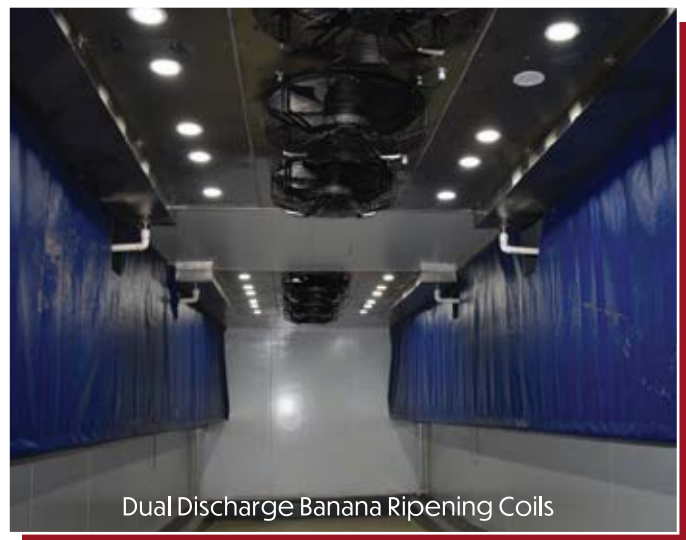

ColCoil manufactures coils and assembled products to customer specifications. We use Unilab software for accurate coil designs to confidently deliver the required performance required from each customer.

A variety of fin materials are available such as aluminium, copper, polyurethane coated aluminium as well as a variety of coatings such as Corrium, Bluchem, Blygold and Polyshure. Copper tube of 3/8", 1/2" and 5/8" in plain or rifle bore of various, appropriate thicknesses are on offer.

ColCoil offers casings in stainless steel, galvanised steel as well as powder coated galvanised steel available through Colcab's state of the art sheet metal shop equipped with the latest technology in laser cutting, CNC punching and bending.
